

PEACH-FACED LOVEBIRD

(Agapornis roseicollis)

This small parrot lives in the dry area of southwestern Africa and measures from 6 to 7 inches (17-18 cm).

They have a rosy face and breast with a green back and belly and a blue patch on the rump. It mostly eats seeds and berries. They lay 4 to 6 eggs that hatch after 21 days. The chicks usually leave the nest after 43 days of age.
