

# SCARLET MACAW

*(Ara macao)*

The Scarlet macaw is a large parrot from the forests of Central and South America. It is approximately 32 inches (81 cm) long and weighs around 2 pounds (1 kg). They spend their time foraging for nuts, fruits and seeds. They lay two or three eggs that take 24-26 days to hatch. The chicks leave the nest around 12 weeks later and often stay with the parents for about a year.
